**Subject:** Opposition to Bill No. 886

Hello,

This letter is in response to senate Bill No. 886. My name is Tom Jablonski owner of Kars Driver Training & Testing LLC and MDS North Inc. As owner of these two driving schools I have hired several drivers education instructors that have gone through different instructors preparation programs. In my experience with Michigan Traffic Safety instructors where very well trained and needed very little further training. I have had only one instructor go through All Star Driver Training witch is the provider that appears to be trying to push this Bill through legislation. That instructor notified me that his training was not adequate and that he did not feel comfortable teaching drivers education with the training provided to him. I trained this instructor for over a month . With him observing me ever day in the classroom. He constantly reminded me that he was not aware of the subjects that I was teaching. It is very concerning that the one provider that I would never send a instructor to for training is trying to reduce the qualifications for new instructors training.
